On 27 March 1952 Minister Selbmann of the Ministry of Metallurgy and Ore-Mining

called

the attention of the Politburo to the unrealistic figures for 1955 copper-ore mining  
(2,650,000 tons) contained in the Five-Year Plan. Selbmann had previously pointed out how  
unrealistic the plan figures were because they included a yield of 850,000 tons of copper  
ore from questionable non-igneous (Sanderz) deposits.

Selbmann severely criticized the irresponsible attitude of the planning authorities  
in simply increasing plan figures without taking the realities of the situation into  
consideration.
